

Hand-held light therapy device giving salon results at home.

Omnilux new-U™ is a handheld, Light Emitting Diode (LED) device for the treatment of periorbital wrinkles, more commonly known as crowsfeet. With the flip of a switch, its patented technology bathes the skin in alternating red and near infrared light.

New-U is suitable for those who have sun-damaged skin and/or fine lines and wrinkles. Omnilux combination phototherapy works with the body's own natural processes to counteract the effects of aging. The different colored lights target specific cells which are responsible for the synthesis and repair of the skin's supportive structures.

"Omnilux New-U improves skin clarity, tone and texture and minimises the appearance of fine lines and wrinkles whilst reversing the effects of sun damage and chronological ageing". Best results will be seen between 4-8 weeks after treatment. The light stimulates natural processes that continue even after the treatment has stopped.

An initial course of 2x20 minute treatments per week for 4 weeks of alternate infrared and red light is recommended. Because the light will not damage the skin, there is no limit on the number of treatments.

How long do the results last?

This depends on the age of the skin and the amount of photodamage. Skin rejuvenation is a dynamic process, and natural expression lines (i.e. lines caused by laughing, smiling, frowning and crying) will gradually return in the course of time. Since we can't stop the aging process; we recommend 2 - 4 follow-up treatments every month.

While Omnilux New-U has been proven to help reduce the visible signs of ageing it is not a substitute for a good skin care regime and should be used alongside a complimentary skincare regime from the Priori, Monoderma and MD Formulations ranges.

UNIT SIZE
H = 12 cm W = 6 cm
D = 4 cm at maximum

The Omnilux new-U has been tested to International standards to ensure that the outputs are safe for use on the skin and also for the eyes. However, for comfort a set of patient goggles are included.
